

Joule Connect - Software to manage JouleTemp & JouleAlarm controls

JouleConnect is software which allows you to view all your JouleTemp and JouleAlarm controllers in a single, integrated software environment which you can easily tailor to your requirements.

The main panel shows the layout of your site and data is updated automatically from the Joule controllers. Click an icon and you switch to the browser window for the selected control.

On the main page you can setup links to a full range of detailed information from each controller - live readings, status as icons or text, settings.

Simple, clear and easy to use! JouleConnect installs on your Windows XP or Vista PC quickly and requires an activation code to access multiple controls but the free version will monitor a single control.

JouleConnect Features:

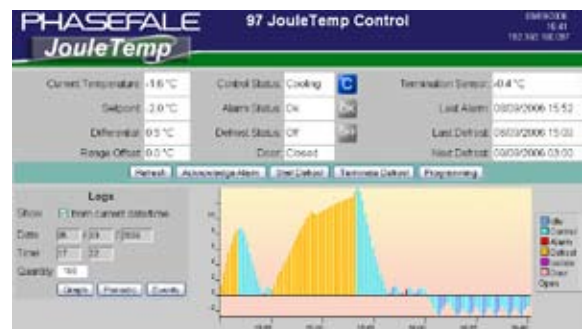

- Windows XP, Vista compatible
- Customizable layout image - simple JPG
- Low cost- free for a single controller
- Monitor as many or as few JouleControls as needed
- Include as much or as little detail as you want on main screen
- Simple setup, easily customized
- Free download from our website

Click on the status icon to display further information about the controller.

The customizable layout screen shows your site and live readings of selected controllers. The tab above switches to other windows, such as the

controller setup screen left, where you add the IP addresses of your controllers.
